

IRIDIUM

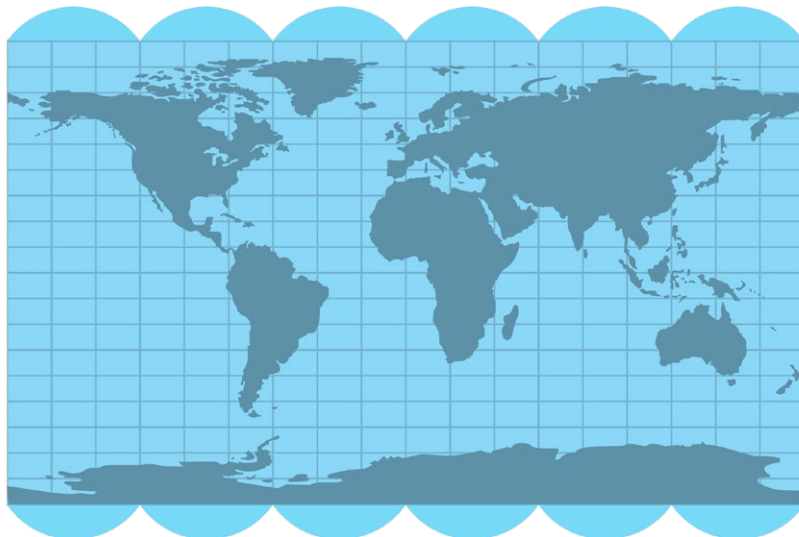

Iridium

Global. Affordable. Proven.

The popular and cost-effective Iridium satellite network is the standard for global voice service in flight. It also helps you achieve compliance with Future Air Navigation System (FANS).

Iridium is also perfect for narrowband data applications like fax, cockpit data, data safety services, and more. The network runs on Low Earth Orbit satellites for reliable global coverage in the air and on the ground at all altitudes and latitudes — even over polar regions.

Worldwide coverage

Applications

- › Narrowband data
- › Voice
- › Data safety services

Supported devices

Iridium voice service requires cabin handsets or mobile devices equipped with the Gogo Text & Talk app

Why Gogo?
