

ForeFlight Mobile goes wireless with Gogo

Get your data. Lose the extra wires and antenna.

Foreflight Mobile is today's industry-leading EFB app, trusted by pilots worldwide. And now, you can wirelessly connect your ForeFlight app to a Gogo AVANCE or ATG system. No additional wiring or separate GPS antennas required.

Simplify your EFB experience.
Reduce on-aircraft installations.

By integrating ForeFlight with Gogo ATG or AVANCE systems, flight information from the aircraft's FMS can now be rebroadcast via the cabin Wi-Fi network to the mobile app.

- Gogo system delivers current Latitude, Longitude and Altitude information to your ForeFlight Mobile app.
- For flight crews, this simplifies the flight deck experience.
- For operators, this simplifies avionic installs by eliminating the need for a separate GPS system or antenna on your aircraft.

FAQs

What is ForeFlight Mobile?

ForeFlight Mobile is an iPhone and iPad (iOS) flight companion for pilots and passengers. It's a source for charts, plates, weather, airports, hotels, flight plan filing, weight and balance, and more.

How does the wireless integration work?

Using an onboard Gogo AVANCE L5/L3 system, or an ATG 4000/5000, ForeFlight Mobile delivers flight location information throughout the aircraft using Gogo's onboard Wi-Fi. This integration eliminates the need for a separate GPS system or additional onboard hardware and antennas.

How does the service work using Gogo's onboard systems vs. when Gogo is not available or installed on an aircraft?

iPads that are "Wi-Fi only" do not have an internal GPS receiver built into them and will require an external GPS receiver if a user want to view GPS position information within ForeFlight Mobile. For users of iPhones and iPads that are "Wi-Fi + Cellular" equipped, there is an internal GPS receiver built into the device. For some users, the built-in GPS receiver will deliver location information using ForeFlight Mobile.

However, some users have found that their device's internal GPS receiver is not adequate for use with ForeFlight for one or more of the following:

- Cockpit has structures obscuring the GPS reception capability.
- Mobile device cases.
- Electrically heated windshields.
- A need to mount the iPad in a location where GPS reception is poor.
- Using an older iPad in an aircraft flying at higher altitudes and faster speeds.

That's why using the application with Gogo's system to deliver the information is advantageous.

What ForeFlight Mobile subscription do I need when using Gogo for data?

ForeFlight customers must have the "Performance Plus" service subscription enabled on their account to take advantage of the Gogo integration. It's currently \$299/year. There is no additional Gogo based service cost for this integration.

What Gogo systems are required for this service?

Gogo AVANCE L5/L3, or Gogo ATG 4000/5000. It is not available using Gogo ATG 1000/2000.

Does ForeFlight work on Android devices?

ForeFlight is only available on iOS devices such as the iPad, iPhone and iPod Touch.

Will ForeFlight Mobile consume data?

Yes – the application will use data from your Gogo data plan. Due to several variables associated with data usage in the ForeFlight mobile app (e.g. frequency of updates), we cannot provide a specific amount of data usage to expect. Data usage varies on a case-by-case basis.

Will ForeFlight work in other countries outside of the U.S. or Canada?

ForeFlight Mobile provides a large variety of information and capabilities, some of which are available for pilots flying anywhere in the world, and some which are only available in certain regions. For more detailed information: <https://foreflight.com/support/support-center/category/about-foreflight-mobile/115013648267>

What version of ForeFlight will work with the many versions of iOS?

The minimum supported version of ForeFlight is version 9.0. ForeFlight version 9.6 and older are not available for download from the Apple App Store unless it already exists in your iTunes purchase history. For a complete list of the minimum iOS versions needed to support each ForeFlight Mobile version: <https://foreflight.com/support/support-center/category/about-foreflight-mobile/218405768>

How do I learn more about ForeFlight Mobile and connecting it to Gogo?

Yes. ForeFlight offers several resources to help you learn how to get the most out of your ForeFlight Mobile app, including how to connect your device to your Gogo system. <https://foreflight.com/support/support-center/category/about-foreflight-mobile/207419167>
